

SIX REASONS WHY A GENERATOR SHOULD CONSIDER XISOT

- 1. Profit enhancement.** Make your generator work for you. Reduce the guesswork in asset operations. XISOT ensures all operators are following the proper pricing signal so you can monetarily optimize the asset.
- 2. Market and price intelligence for your specific price point.** Optimize your generation assets based on market trends specific to you. View a live ISO portfolio feed, monitor grid demand, manage schedules, and dispatch assets easily from the same portal.
- 3. Predictive data analytics.** Forecast your real-time LMPs and ISO-load information. Get the data you need at the right time based on our proprietary algorithm. Optimize your generator to get ahead of the signal and make more profit.
- 4. Consolidated financial reporting.** XISOT automates the data for you. You get hands-off, custom reporting options covering your generator specs, 100% warehoused within the system. With cloud-based and mobile applications, you can access your data 24 / 7, from anywhere.
- 5. Tailored alerts and notifications.** Know what to do and when to do it. XISOT notifies you when actions are necessary to avoid RTO penalties.
- 6. Intuitive and easy-to-use.** Our proprietary software is customized for your operations. XISOT is fully integrated with your existing control room technology infrastructure. It puts data and control in the hands of your operations team.
